Dear Ms. Flood -

I am a neighbor of an RID water well that has Siemens' filter tanks. I understand that these tanks were installed by RID to remove contaminants in groundwater pumped from the well next door. Nobody around here even knew that we were breathing these chemicals for so many years.

I want to thank RID for their work, and ask the state to support their efforts. We've had the groundwater under our business contaminated for a long time and its great to see somebody take action to clean up the area and take the chemicals out of the air we breathe.

Please contact me any time with questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Silvano Gutierrez". The signature is fluid and cursive, with a large loop at the end.
