

**December 3, 2014**

**Ms. Flood,**

**I am the owner, of Ruiz Custom Upholstery located at 2311 West Van Buren Street in Phoenix. We are located next to a Roosevelt Irrigation District well site with Siemens' water tanks. I have recently been told that the tanks are used to remove toxic chemicals in the groundwater pumped from the well. We have been in business since 1988 and just became aware of this problem. How long have the toxic chemicals been in the groundwater? Do I need to let my employees know about this?**

**My company appreciates Roosevelt's work to treat the water and hope that the work continues.**

**Thank you,**

**Manuel Ruiz
